

## OUTDOOR TOWER SERIES | PREMIER TOWER SPEAKER

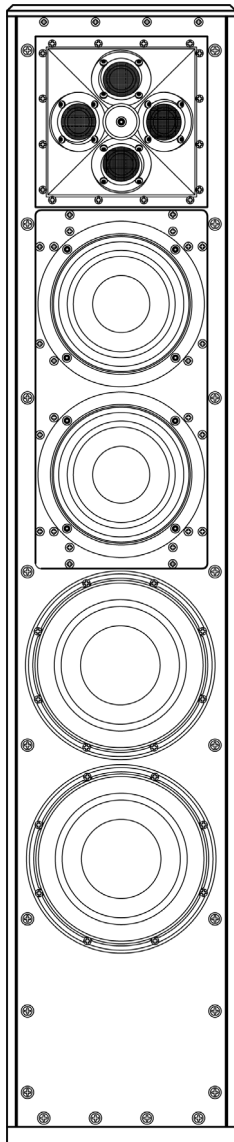

### OT88Q ULTRA-HIGH OUTPUT FULL RANGE

The new James Loudspeaker OT88Q is a high-performance tower speaker designed to deliver concert-level performance outdoors.

- Quad tweeter array for wide dispersion and crisp fidelity
- Biamped, sealed bass enclosure for smooth and powerful bass response
- Marine grade aluminum construction with fluoropolymer coating for solid, secure and long-lasting performance
- Low impedance or 70V configurations
- Flexible installation for hardscape (External Mount, included) or landscape (Internal Mount, optional) with easy access in-field servicing through the grille
- Designed and tested for effortless high SPL playback over extended periods of time
- 10 standard finishes (infinite custom finishes available)
- Custom James Loudspeaker wiring harnesses available
