SN8400 Standard Cabinet
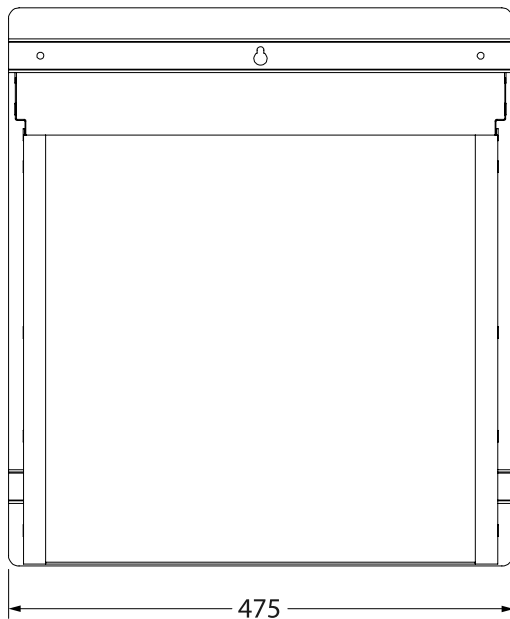

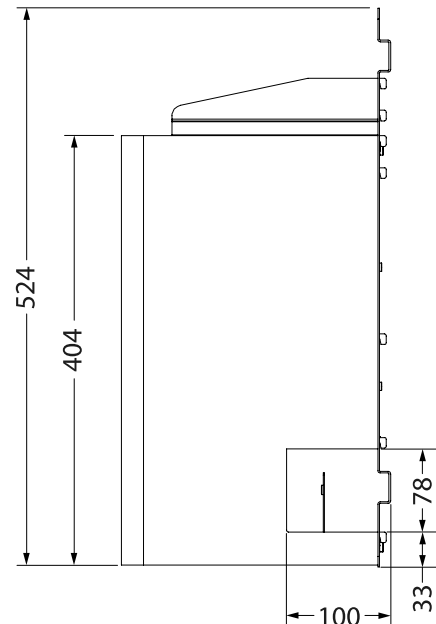

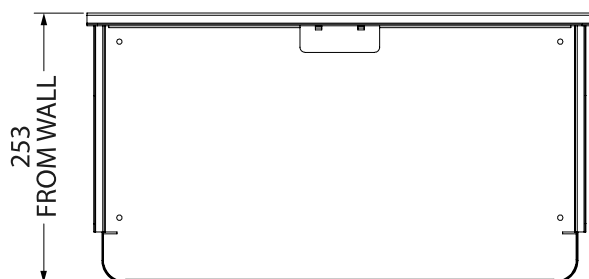

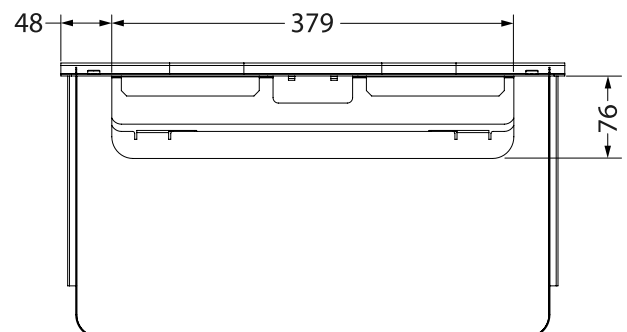

Specification Data Sheet
Rev 1.0 September 2014
Armour Home Electronics R&D Department
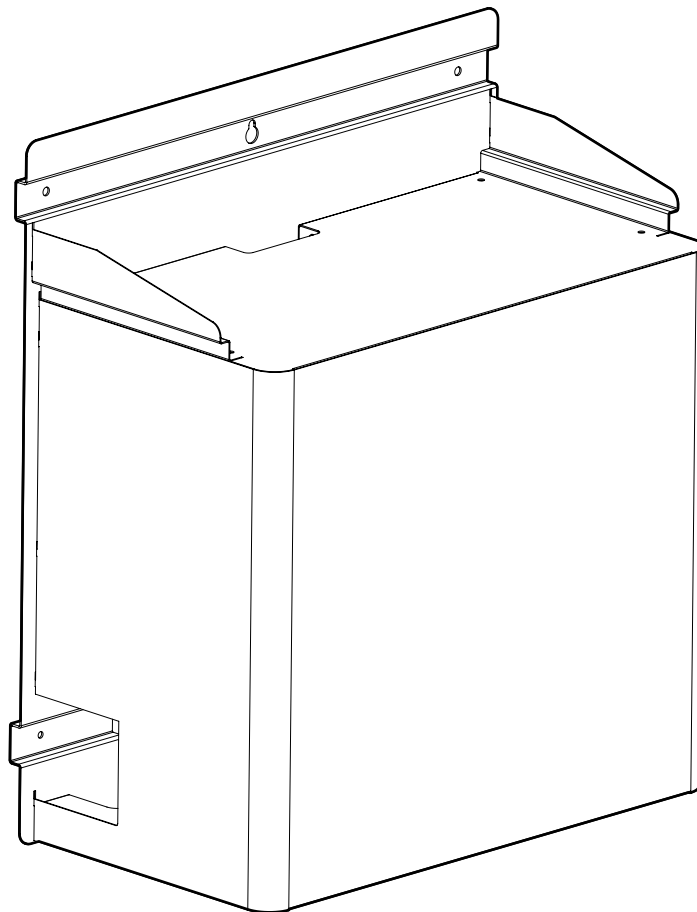

The S7 standard enclosure is a compact, cost effective, professional enclosure for a finished S7 system supporting up to 4 zones. It has been designed with ease of installation in mind, but with some key installation details such as cable tie positions, cable management box, 100mm trunking cable entry and rear stud wall cable entry. The cabinet comes complete with fixing screws for two NetAmps. A separate accessory pack is available which contains the RJ45 patch panel and USB Hub.
