

RCA phono cable, 1.5m / 2.5m

The RCA phono cable is equipped with gold-plated contacts and ensures perfect contact reliability for all connected devices. The audio signal is transmitted via an OFC copper inner conductor, which has been carefully shielded with selected insulating materials. Combined with its very solid build quality, the RCA cable ensures a stable connection and delivers a neutral, authentic sound.

Features:

- Neutral sound pattern
- Secure connection
- Gold-plated contacts
- Copper conductor material
- Shielded conductors
